PROFILE

Dedicated IT Engineer with a solid academic foundation in Information Technology and Systems and a lifelong passion for programming. I possess practical experience across a diverse tech stack, including C#, Java, and Python backend solutions, alongside expertise in REST API development and system automation gained through professional internships. I am characterized by a methodical approach to solving complex technical challenges and a strong commitment to continuous professional growth within innovative software teams.

UNIVERSITY INTERSHIPS EXPERIENCE

Jan 2025 – Apr 2025

Sky Soft d.o.o. | Niš, Serbia

Backend Developer Intern

- Developed and optimized REST APIs using C# and ASP.NET to enhance backend performance.
- Implemented AI-driven solutions by building a project focused on generating automated responses using Python (FastAPI).
- Applied advanced coding strategies and architectural patterns to ensure high-quality software solutions.

Dec 2024 – Dec 2024

Nignite | Niš, Serbia

Backend Developer Intern

- Engineered a custom plugin for an ECS-based project, gaining hands-on experience in large-scale software architecture.
- Gained exposure to Manufacturing Execution Systems (MES), understanding complex industrial software workflows.
- Automated internal document workflows by developing scripts for Google Workspace using JavaScript (Google Apps Script).

EDUCATION

Oct 2021 – Mar 2026

METROPOLITAN UNIVERSITY |

NIŠ, SERBIA

- Bachelor of Science in Information Technology and Systems

Sep 2017 – May 2021

GIMNAZIJA "9. MAJ" | NIŠ, SERBIA

- High School Diploma

LANGUAGES

- Serbian: Native.
- English: B2 (Upper Intermediate).

SOFT SKILLS

- Problem-solving: Methodical approach to resolving complex technical hurdles.
- Team Collaboration: Experience working in on-site and hybrid team environments.
- Time Management: Proven ability to manage academic responsibilities alongside professional internships.

	Critical Thinking: Applied during the development of complex systems and architectural discussions.
PROJECTS Dog Show Management System (Graduation Thesis) - Designed and developed a comprehensive full-stack system for dog show registration and event management as a primary academic project. - Implemented complex business logic for handling registrations and data organization, ensuring a seamless workflow for organizers and participants. - Utilized core software engineering principles to architect a stable and scalable database structure. To-Do Web Application - Developed a full-stack task management application as part of a competitive job selection process. - Managed separate frontend and backend repositories on GitHub, demonstrating proficiency in version control and clean code practices. - Successfully implemented core CRUD functionalities and a responsive user interface. Academic Portfolio - Built a variety of desktop and web applications during university studies using Python, Java, and C++. - Focused on implementing fundamental Data Structures and Algorithms to solve diverse technical problems. GitHub Repository: github.com/imakamai - Showcasing source code for personal projects, academic assignments, and ongoing development work.	TECHNICAL SKILLS - Backend Development: C#, Java (Spring Boot), Python (FastAPI), .NET Framework. - Frontend Development: HTML5, CSS3, JavaScript, React, Angular. - Architecture & Tools: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), ECS (Entity-Component-System). - Automation: Google Apps Script
